## Standard Features

### Bi-Directional Two-Quadrant Output

Full power Bi-Directional two quadrant operation maintains the DC output voltage constant

whether the output power is positive or negative. Ideal for PWM-speed controlled DC-Motors and ATE systems.

### Digital CV-, CC- and CP-Settings

Reliable, longlife digital encoders are implemented at the front panel. Includes total

front panel lock (also for CV- / CC-knobs) and a coarse or fine pitch adjustment depending on the turning speed.

### Sequencer

Arbitrary Waveform generator or standalone automation.

### High Voltage Isolation

A high DC output isolation allows series operation up to 1000 V for SM500-CP-90, and up to 1500V for SM1500-CP-30.

### Ethernet Interface

Ethernet interface for programming and monitoring.

### USB-Input

Not yet available: Front and rear panel USB-Input for exchange of settings and waveforms (Host / Type-A), or for controlling the unit (Device / Type-B).
