SM15K series

For full specifications and order information please visit www.deltapowersupplies.com

Features

- Bi-directional power supply with standard 15 kW source and sink
- Flexible output with Constant Power characteristics
- Power Regeneration Technology: in sink mode the PSU returns the energy back into the grid
- Very low heat dissipation. Efficiency is more than 95%
- No need for expensive cooling systems
- Excellent dynamic responses to load changes incl. all-digital control to adapt regulation to match load type

Functionalities

- Operation on wide range of 3 phase AC-input voltages
- Low audible noise: temperature controlled cooling fans
- Large user display, menu driven operation
- Durable digital encoders for voltage and current adjustment and menu operation
- Max. 4 plug and play optional interfaces
- Ethernet interface, built-in sequencer and web interface are included

Specifications

- Input voltage (3 phase): 342-528 V AC (48-62 Hz)
- Active Power Factor Correction (PFC): up to 0.996 (at 100 % load)
- Efficiency (sink & source mode): up to 96% (at full load)
- Output ripple and spikes: from 10 mVrms / 55 mVpp
- Regulation: from 4 mV (0-100% load step)
- Recovery time: from 100 µs (50-100% load step)
- Programming speed: from 1.5 ms (10-90%)
- Output voltage and current stability: from 50.10^-6 / 80.10^-6
- MTBF: 500,000 hrs
- Operating ambient temperature: -20 to +50 °C

Dimensions and Weight

- Width = 19”
- Height = 3 U
- Weight = 27 kg

Standards

- Power supply standard: EN 61204-3
- Generic Emission: EN 61000-6-3 (EN 55022B)
- Generic Immunity: EN 61000-6-2
- Safety: EN 60950 / EN 61010
- Insulation input / output: 3750 Vrms
- Enclosure: IP20
APPLICATIONS & OPTIONS

SM15K series

Typical Applications
- Solar inverter testing, PV-Simulation
- Car testing systems
- ATE in industrial production lines
- Plasma chambers
- Automotive battery simulations
- Controlled battery (dis)charging
- Lasers
- Sustainable energy
- Driving PWM-Controlled DC motors
- Accurate current sources
- Aerospace and military equipment

Standard Features

Bi-Directional Two-Quadrant Output
Full power Bi-Directional two quadrant operation maintains the DC output voltage constant whether the output power is positive or negative. Ideal for PWM-speed controlled DC-Motors and ATE systems.

Digital CV-, CC- and CP-Settings
Reliable, longlife digital encoders are implemented at the front panel. Includes total front panel lock and a coarse or fine pitch adjustment depending on the turning speed.

Sequencer
Arbitrary Waveform generator or standalone automation.

High Voltage Isolation
A high DC output isolation allows series operation up to 1000 V.

Ethernet Interface
Ethernet interface for programming and monitoring. Integrated function blocks: leadless sensing and internal resistance.

Flex output: Constant Power
Flexible output with Constant Power characteristics.

Available Options

Software Control and Interfaces
Plug&Play interfaces:
- Isolated analog programming interface
- Digital I/O interface
- Interface with isolated contacts
- Serial interface with multiple protocols: RS232, RS485, RS422 and USB (device)
- Master / Slave interface (up to 300 kW)

Master / Slave assembly kit
Connection sets for master / slave set-ups using the M/S PAR or M/S SER assembly kits.

SM6000 series

6000 W DC POWER SUPPLIES

For full specifications and order information please visit www.deltapowersupplies.com

Features

- Designed for long life at full power
- Excellent dynamic response to load changes
- Protected against all overload and short circuit conditions
- EMC surpasses CE requirements: low emission & high immunity
- Low audible noise: fans are temperature controlled

Functionalities

- Master/Slave parallel and series operation with voltage and current sharing
- Stacking is allowed, space between units is not required
- High power system configuration from multiple units
- 19" rack mounting or for laboratory use (feet included)
- Remote sensing
- Interlock

Specifications

- Three phase input
  (rated voltage input) : 380 - 480 V AC
  \( V_{\text{nom}} \) line to line (48-62 Hz)
- Active Power Factor Correction (PFC) : 0.98 (at 100% load)
- Efficiency : up to 90% (at full load)
- Output ripple and spikes : from 0.8 \( mV_{\text{rms}} \)/ 8 \( mV_{\text{pp}} \)
- Regulation : from 2.5 \( mV \) (0-100% load step)
- Recovery time : from 100 \( \mu \text{s} \) (50-100% load step)
- Programming speed : from 2.7 ms (10-90%), optional from 0.4 ms
- Analog programming accuracy : from 0.2%
- Output voltage and current stability : 5.10^{-1}/10.10^{-1}
- MTBF : 500,000 hrs
- Operating ambient temperature : -20 to +50 °C

Standards

- Power supply standard : EN 61204-3

- Insulation input / output : 3750 \( V_{\text{rms}} \)
- Enclosure : IP20
- cTÜVus

Dimensions and Weight

Width = 19”  Weight = 27 kg
Height = 4 U
APPLICATIONS & OPTIONS

SM6000 series

Typical Applications

- Solar Inverter testing, PV-simulation
- Plasma chambers
- Hybrid car test systems
- ATE in industrial production lines
- Automotive battery simulation
- Controlled battery (dis)charging
- Lasers
- Driving PWM-controlled DC-motors
- Accurate current sources
- Aerospace and military equipment

Available Options

Increased Output Power
The conservatively rated unit allows to deliver extra output power with the same reliability. At some derating, either the maximum output voltage or the maximum output current can be increased by about 10%.

High Speed Programming
A 10 to 20 times higher programming speed (down to 0.4 ms rise time at full load) and lower output capacitance. Excellent for laser applications, test systems or as current source with low parallel capacitance as used in plasma chambers.

2-Quadrant Output: Power Sink
2 quadrant operation maintains the output voltage constant regardless the output power is positive or negative (for units up to 70 V). Ideal for PWM-speed controlled DC-motors and ATE systems.

Sequencer
Arbitrary Waveform generator or stand-alone automation. The sequencer is integrated in the Ethernet controller.

Digital Voltage and Current Setting
Reliable, longlife digital encoders are implemented at the front panel. Includes total front panel lock and a coarse or fine pitch adjustment depending on the turning speed is standard on SM300-20 and SM600-10.

Secured Voltage and Current Setting
For maximum security, the settings for CC and CV can be adjusted with a screwdriver only and are protected with a plastic cap from accidental adjusting. SM300-20, SM600-10 and units with digital voltage and current setting already have secured settings.

Software Control and Interfaces
Factory installed programming interfaces:

- Ethernet (incl. sequencer & digital I/O)
- RS232
- IEEE488
- PROFI BUS
- CAN BUS
- ISO AMP card - isolated analog (standard on SM300-20 & SM600-10)

For full specifications and order information please visit www.deltapowersupplies.com
SM3300 series
3300 W DC POWER SUPPLIES

Features
• Designed for long life at full power
• Excellent dynamic response to load changes
• Protected against all overload and short circuit conditions
• EMC surpasses CE requirements: low emission & high immunity
• Low audible noise: fan is temperature controlled

Functionalities
• Operation on single and three phase input voltages
• Standard Ethernet interface, incl. sequencer
• Large user display, menu driven operation
• Durable digital encoders for voltage and current adjustment
• Max. 4 plug and play optional interfaces
• USB input at the front for exchange of settings and wave forms

Specifications
• Single and three phase input : 180-528 V AC (single or three phase 48-62 Hz) derating at low input voltage
• Active Power Factor Correction (PFC) : up to 0.99 (at 100 % load)
• Efficiency : up to 92% (at full load)
• Output ripple and spikes : from 3 mW_{peak} / 12 mV_{peak}
• Regulation : from 2.5 mV (0-100% load step)
• Recovery time : from 100 µs (50-100% load step)
• Programming speed : from 1.6 ms (10-90%), optional from 0.2 ms
• Output voltage and current stability : from 6.10^{-5} / 9.10^{-5}
• MTBF : 500,000 hrs
• Operating ambient temperature : -20 to +50 °C

Applications & Options

ES150 / 300 series

Typical Applications
- Test and Measurement
- Controlled battery charging
- Electronic Circuit Development
- Component device testing
- ATE in industrial production lines
- Laboratory analysis
- Medical research equipment
- Accurate current sources

Available Options (Not for EST150)

Increased Output Power
The conservatively rated unit allows to deliver extra output power with the same reliability. At some derating, either the maximum output voltage or the maximum output current can be increased by about 10%.

Secured Voltage and Current Setting
For maximum security, the settings for CC and CV can be adjusted only and are protected with a plastic cap from accidental adjusting.

Sequencer
Arbitrary Waveform generator or stand-alone automation. The sequencer is integrated in the Ethernet controller.

Rear Power Output and Remote Sensing
Output terminals at the rear panel instead of bind posts at the front panel, includes remote sensing.

19" Rack Mounting Adapter
Rack adapter sets for positioning the ES300 or ES150 units in a 19" rack. Several mounting options possible.

Software Control and Interfaces
Factory installed programming interfaces:
- Ethernet (incl. sequencer)
- RS232
- PROFIBUS
- CANBUS

External programming interface modules:
- Ethernet module
- IEEE488 module
- ISO AMP module
- RS232 module

For full specifications and order information please visit www.deltapowersupplies.com
 EST150 series 150 W, TRIPLE OUTPUT DC POWER SUPPLIES

Features
- Very low output ripple and spikes
- EMC surpasses CE requirements: low emission & high immunity
- Excellent dynamic response to load changes
- Protected against all overload and short circuit conditions
- Designed for long life at full power

Height = 146 mm, incl. feet

Specifications

- Single phase input: 90-265 V AC (48-62 Hz)
- Active Power Factor Correction (PFC): 0.99 / 0.83 (at 100% load)
- Efficiency: up to 81% (at full load)
- Output ripple and spikes: from 0.5 mVrms / 8 mVpp
- Regulation: from 5 mV (0-100% load step)
- Recovery time: 100 µs (50-100% load step)
- Tracking accuracy: 0.5%
- Output voltage and current stability: 10⁻⁵ / 10⁻⁵
- MTBF: 500,000 hrs
- Operating ambient temperature: -20 to +50 °C

Standards

- Power supply standard: EN 61204-3
- Generic Emission: EN 61000-6-3 (EN 55022B)
- Generic Immunity: EN 61000-6-2
- Safety: EN 60950 / EN 61010 / SELV
- Insulation input / output: 3750 Vrms
- Enclosure: IP20

For full specifications and order information please visit www.deltapowersupplies.com
SM15K interfaces

**Interfaces**

| INT MOD CON | Isolated Contacts Interface |
| INT MOD SER | Serial Interface |
| INT MOD DIG | Digital I/O Interface |
| INT MOD M/S-2 | Master/Slave Interface SM15K |
| INT MOD ANA | Isolated Analog interface |

**General Features**

- Plug and play for the SM15K series power supplies
- Multiple interfaces possible per power supply
- Isolated from the output voltage
- Working voltage 1000 V
- Floating with respect to earth

**Features**

**INT MOD CON**

Isolated contacts

- 4 relays with make-and-break contacts
- Additional (floating) Interlock with 24 V enable system
- Programmable via Ethernet

**INT MOD SER**

Serial controller interface

- Multi protocol: RS232, RS485, RS422, USB
- Web based configuration
- Speeds up to 115.2 kbps

**INT MOD DIG**

Digital (user) I/O

- 8 inputs Logic high = 2.5 .. 30 V, Logic low = 0 V
- 8 Open Drain outputs 0 - 30 V, max. 200 mA
- Programmable via Ethernet or sequences

**INT MOD M/S-2**

Master/Slave Interface SM15K

- Easy control of series or parallel operation
- Multiple power supplies behave as one power supply
- Large system, up to 300 kW

**INT MOD ANA**

Analog controller interface

- High accuracy, low drift
- 16 bit AD and DA conversion
- Isolated from the output voltage, working voltage 1000 V DC

For full specifications and order information please visit www.deltapowersupplies.com
SM3300 interfaces

</tbody>
</table>

Features

Features INT MOD ANA
Analog interface
- High accuracy, low drift
- 16 bit AD and DA conversion
- Compatible with other Delta Elektronika 15p analog interfaces
- Factory calibrated for optimum accuracy

Features INT MOD DIG
Digital (user) I/O interface
- 8 inputs Logic high = 2.5...30 V, Logic low = 0 V
- 8 Open Drain outputs 0 - 30 V, max. 200 ma
- Programmable via Ethernet or sequences

Features INT MOD SIM
Simulation interface
- High accuracy simulation
- Simulation of photovoltaic, leadless sense compensation, internal resistance and foldback current
- Custom programmable table, for simulation of complex I-V curves
- Configurable through web and GUI

Features INT MOD CON
Isolated contacts interface
- 4 relays with make-and-break contacts
- Additional (floating) Interlock with 24 V enable system
- Programmable via Ethernet

Features INT MOD SER
Serial interface
- Multi protocol RS232, RS485, RS422, USB
- Web based configuration
- Speeds up to 115.2 kbps

Features INT MOD M/S
Master / Slave interface
- Easy control of series or parallel operation
- Multiple power supplies behave as one power supply
- Mixed series and parallel is also possible

General Features

- Isolated from the output voltage
- Working voltage 1000 V
- Floating with respect to earth
- Plug & Play interfaces for the SM3300 series power supplies
- Multiple interfaces possible per power supply

PSC series

INTERFACES

Features
- Voltage and current programming and monitoring
- Uses existing IP-networks
- Integrated sequencer
- Software calibration
- Isolated digital user in- and outputs
- Factory installed or as an external module

Specifications
- Programming and monitoring resolution: 16 bit
- Linearity error: ±2 LSB (prog.)
  ±1 LSB (mon.)
- TC = 10 ppm/°C
- Input voltage (external module): 98-264 V AC (48-62 Hz)

Interface

<table>
<thead>
<tr>
<th>Interface</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSC-ETH</td>
<td>Ethernet interface</td>
</tr>
</tbody>
</table>

Functionalities

Interface:
- Monitoring status outputs: ACF, DCF, CC-mode, Over-Temp, PSOL etc.
- Isolated user inputs (8) and outputs (6)
- Software calibration for offset and full scale

Integrated sequencer:
- Converts power supply into an arbitrary waveform generator
- Stand-alone automation like a PLC
- 25 free programmable sequences, 2000 steps each
- Combination of very fast and slow sequences
- Possibility to create loops, sub-routines, ramps etc.

External module PSC-ETH

Standards:
- Generic Emission: EN 61000-6-3 (EN 55022B)
- Generic Immunity: EN 61000-6-2
- Safety: EN 60950 / EN 61010
- Insulation:
  - in/outputs - case: 1000 Vcc
  - Enclosure: IP20

Dimensions and weight:
- Dimensions: 89 x 86 x 119 mm
- Weight: 0.7 kg
- Optional 19” rack mounting

PSC series

INTERFACES

Interfaces

<table>
<thead>
<tr>
<th>Interface</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSC-CAN</td>
<td>CANopen interface</td>
</tr>
<tr>
<td>PSC-PB</td>
<td>PROFIBUS interface</td>
</tr>
</tbody>
</table>

Functionalities

**CANopen Functionalities:**
- SYNC Object
- Emergency Object
- Node Guarding
- Heartbeat
- Expedited and Nonexpedited SDO transfer
- Node address range 1 - 127

**PROFIBUS Functionalities:**
- Slave in a PROFIBUS-DP network
- DP-V0 standard acc. IEC 61784 Ed. 1:2002 CPF 3/1
- PROFIBUS protocol acc. IEC 61158
- Slave address range 1 - 127

Features

- Voltage and current programming and monitoring
- Node address setting selectable
- Read back of power supply status signals
- 600 V galvanic isolation
- Factory installed

Specifications

- Programming and monitoring resolution: 14 bit
- Communication speed:
  - up to 12Mbit/s for PSC-PB
  - up to 1Mbit/s for PSC-CAN
- Full scale accuracy: < 0.1%

Features (PSC series)

- Voltage and current programming and monitoring
- Node address setting selectable
- Read back of power supply status signals
- 600 V galvanic isolation
- Factory installed

Specifications (PSC series)

- Programming and monitoring resolution: 16 bit
- Linearity error:
  - +/- 2 LSB (prg.)
  - +/- 1 LSB (mon.)
- TC = 10 ppm/°C
- Input voltage (external module): 98-264 V AC (48-62 Hz)

External module PSC-232 / 488

**Standards:**
- Generic Emission: EN 61000-6-3 (EN 55022B)
- Generic Immunity: EN 61000-6-2
- Safety: EN 60950 / EN 61010
- Insulation input / output: 1000 V rms
- Enclosure: IP20

**Dimensions and weight:**
- Dimensions: 89 x 86 x 119 mm
- Weight: 0.8 kg
- Optional 19” rack mounting

For full specifications and order information please visit www.deltapowersupplies.com
Analog series

**Unit**
- **ISO AMP** | Isolated Analog Programming

**Features**
- Selectable 0-5 V and 0-10 V signal levels
- Isolated programming and monitoring of U, I and status signals
- Prevents problems with earth loops and CM-voltages
- Factory installed or external module
- Reinforced safety insulation 1000 V DC*

**Specifications**
- Programming and monitoring offset : +/- 60 µV typical
- Full scale error : 0.1% calibrated
- Non-linearity : 0.01% typical, TC = - 65ppm/°C
- Common mode rejection : 80 dB @ 50 Hz

For full specifications and order information please visit [www.deltapowersupplies.com](http://www.deltapowersupplies.com)

---

**Unit**
- **M/S - ADAPTER** | Master/Slave Series Adapter

**Features**
- Connecting ES-series in M/S series mode
- Equal voltage sharing in series operation
- Series operation possible up to 600 V

**Specifications**
- Programming and monitoring offset : +/- 60 µV typical
- Full scale error : 0.1% calibrated
- Non-linearity : 0.01% typical, TC = - 65ppm/°C
- Common mode rejection : 80 dB @ 50 Hz

---

**Unit**
- **PAR PROG ADAPT** | Parallel Programming Adapter

**Features**
- Each power supply gets the same information
- Easy way of connecting power supplies in parallel
- Fastest way to program multiple power supplies (unlimited quantity)

**Specifications**
- Programming accuracy : see data sheet of power supply
- Current Monitoring accuracy : add 0.2% to spec of power supply
- Voltage Monitoring accuracy : see data sheet of power supply
