Available Options

Increased Output Power

The conservatively rated unit allows to deliver extra output with the same reliability.

At some derating, either the maximum output voltage or the maximum output current can be increased by about 10%.

Order Code :

- P069

High Speed Programming

A 10 to 20 times higher programming speed (down to 0.2ms rise time at full load) and lower output capacitance¹⁾. Excellent for laser applications, test systems or as current source with low parallel capacitance as used in plasma chambers.

Order Codes :

- SM 15-100 P210 – SM35-45 P211
- SM 52-30 P212 – SM52-AR-60 P213
- SM 70-22 P214 – SM120-13 P215
- SM 300-5 P216 – SM400-AR-8 P217

Two-Quadrant Output Power Sink

Two quadrant operation maintains the DC output voltage constant regardless the output power is positive or negative¹⁾. Ideal for PWM-speed controlled DC-Motors and ATE systems.

Order Codes :

- SM 15-100 P202 – SM35-45 P203
- SM 52-30 P204 – SM52-AR-60 P205
- SM 70-22 P206

Sequencer

Arbitrary Waveform generator or standalone automation. The sequencer is integrated in the Ethernet controller.

Order Code :

- P177

Digital CV- and CC-Settings

Reliable, long-life digital encoders can be implemented at the front panel. Includes total front panel lock (also for CV- / CC-knobs) and a coarse or fine pitch adjustment depending on the turning speed.

Order Code :

- P220

Secured Voltage and Current Settings

For maximum security, the CV/CC settings can be adjusted with a screwdriver only and are protected with a plastic cap from accidental adjusting.

Order Code :

- P001

Software Control and Interfaces

Interfaces to be installed by factory ²⁾.

Order Code:

- Ethernet controller (including sequencer) - P177
- ISO AMP Card - isolated analog - P218
- RS232 controller - P183
- IEEE488 controller - P184
